Introduction

National AIDS Control organization (NACO), Ministry of Health and Family Welfare, Government of India periodically undertakes HIV estimation process to provide the updated information on the status of HIV epidemic in India. First HIV estimation in India was done in 1998 while last round was done in 2020. India HIV Estimates 2021, latest round in the series, was undertaken using UNAIDS recommended 'Spectrum' tool as in previous rounds. Spectrum version 6.18, the latest version available during the implementation period, was used. This fact sheet provides estimates on key epidemiological parameters of HIV prevalence, PLHIVs, new infections, AIDS related mortality, elimination of mother to child transmission. The fact sheet also includes progress on 95-95-95.

HIV Estimation 2021 has been implemented through the robust institutional structures of Technical sub-group (HIV Burden Estimation), Technical Working Group (TWG): Surveillance & Epidemiology (S&E) and Technical Resource Group (S&E) under the National AIDS and STD Control Programme (NACP). The robust institutional structures have multi-disciplinary membership including representation from the national and regional institutes for integrated and enhanced surveillance & epidemiology (IESE) of NACP. The institutes include (i) All India Institute of Medical Sciences (AIIMS-Delhi), (ii) ICMR-National Institute of Medical Statistics (ICMR-NIMS, New Delhi), (iii) ICMR-National AIDS Research Institute (ICMR-NARI, Pune), (iv) ICMR-National Institute of Epidemiology (ICMR-NIE, Chennai), (v) Post Graduate Institute of Medical Education and Research (PGIMER, Chandigarh), (vi) ICMR-National Institute of Cholera and Enteric Diseases (ICMR-NICED, Kolkata) and (vii) Regional Institute of Medical Sciences (RIMS-Imphal). Under the NACP institutional arrangements for IESE, ICMR-NIMS undertakes HIV burden estimations in collaboration with NACO's Surveillance & Epidemiology (Strategic Information) division.

At the national level, estimated adult HIV prevalence (15-49 years) has declined since the epidemic's peak in 2000 where prevalence was estimated at 0.55% in 2000, through to 0.32% in 2010, and 0.21% in 2021. The north-east region States have the highest adult HIV prevalence (2.70% in Mizoram, 1.36% in Nagaland and 1.05% in Manipur), followed by southern States (0.67% in Andhra Pradesh, 0.47% in Telangana and 0.46% in Karnataka). The number of People Living with HIV (PLHIV) are estimated at around 24 lakhs. Southern States have the largest number of PLHIV viz. Maharashtra, Andhra Pradesh and Karnataka being the top three.

Annual New Infection (ANI) are estimated at 62.97 thousand in 2021 in India. There is an estimated 46.3% decline in ANI at national level from 2010-2021. A declining trend is noted in most States. Top 3 States with most rapid decline are Himachal Pradesh (with around 73% decline from 2010-2021), Tamil Nadu (around 72% decline), Telangana (nearly 71% decline). An increasing trend is estimated in the northeast States of Tripura, Meghalaya, Arunachal Pradesh, Assam, Sikkim, Mizoram, and the Union Territory of Dadra and Nagar Haveli and Daman and Diu.

AIDS Related Deaths (ARD) are estimated at 41.97 thousand in 2021 in India. A decline of 76.5% in ARD has been estimated at national level from 2010-21. The declining trend is noted in all States/UTs excluding Puducherry, Arunachal Pradesh, Meghalaya, and Tripura. The highest decline in ARD is estimated in Chandigarh, Telangana, and West Bengal.

PMTCT need are estimated at 20,612 in 2021 in India. Top 3 states accounting for the highest need are Maharashtra (12.9%), Bihar (11.9%) and Uttar Pradesh (10.6%).

Latest 2021 HIV estimates provide critical evidence to help inform further geographic and population prioritization of HIV prevention, testing, treatment efforts [ART & PMTCT] under the NACP, as national efforts are in the 'last mile' towards the AIDS 'End-Game'. As the HIV estimates have shown that the epidemic is not evenly spread between States/UTs, more granular population and location planning and programming is needed to guide actions.
